Mobile: +91-9600205581
Address: Phagwara

SKILLS

- **Languages:** C++, C, Python, Java, JavaScript, HTML
- **Frameworks/Libraries:** React, Tailwind CSS, Flask, TensorFlow, PyTorch, NumPy, Pandas, Matplotlib, Scikit-learn
- **Tools/Platforms:** LeetCode, Github, Git, Excel, VS Code, Jira, Overleaf
- **Skills:** Machine Learning, Data Visualization, Problem-Solving, Logical Reasoning, Quantitative Aptitude, Adaptability, Leadership, Teamwork

PROJECTS

- **Fraud Detection in Transactions** Since Sep 2025
 - Developing a machine learning model-based fraud detection system to classify legitimate and fraudulent transactions using patterns in user behavior and anomaly detection.
 - Implementing data preprocessing, feature engineering and model training using Python, Pandas and Scikit-learn to improve prediction accuracy.
 - Designing a real-time classification pipeline with clean UI and API integration to stimulate transaction input and display fraud risk result.
 - **Tech:** Python, Pandas, Scikit-learn, Logistic Regression, Random Forest, XGBoost, Flask, Streamlit
- **Aplytics** July 2025
 - Developed an AI-powered resume analysis system that extracts text, identifies key skills and generates improvement suggestions using NLP techniques.
 - Built a complete web application with Flask backend and an interactive frontend. Implemented NLP-based parsing and automated insights for user uploaded resumes.
 - Successfully deployed the application on render and added UptimeRobot monitoring to ensure continuous availability, gaining hands on experience in AI model integration, preprocessing and production deployment.
 - **Tech:** Python, Flask, NLP, HTML, JavaScript, Render, UptimeRobot
- **Churn Predictor** Mar 2025
 - Developed a customer churn prediction system that identifies whether a user is likely to discontinue a service based on key behavioral and demographic inputs.
 - Implemented a clean interactive frontend for real-time prediction and visualization.
 - Built the churn interactive logic using lightweight ML model and integrated it with the UI to deliver fast, user-friendly results.
 - Designed input validation and output interpretation to make the system accessible even for non-technical users.
 - **Tech:** HTML, CSS, JavaScript, Machine Learning

CERTIFICATES

- Basics of Data Structures and Algorithms using C++ | Lovely Professional University Nov 2025
- Mastering Generative AI and Generative AI Tools | Udemy Sep 2025
- Unveiling Basic Python Towards AI/ML | CSE PathShala Mar 2024
- Beginning C++ Programming from Beginner to Beyond | Udemy Feb 2024

ACHIEVEMENTS

- **Top 10 Finalist in Code-A-Haunt Hackathon**
Ranked among the **top 10** teams for building an innovative solution under time constraints.
- **Actively Solving Coding Problems on LeetCode**
Strengthening problem-solving and algorithmic thinking through consistent practice, aiming to solve 300+ problems.
- **Participated in Adobe India Hackathon**
Selected for **round 2**, gaining hands-on experience in brainstorming, prototyping and presenting skills.
- **First Place in Communication Skills Workshop**
Secured 94% and received a trophy for excellence in articulation, clarity and presentation skills.

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.6 Since August 2023
- **Excel Central School** Tamil Nadu, India
Indian School Certificate (ISC); Percentage: 81% June 2021 – March 2023
- **Excel Central School** Tamil Nadu, India
Indian Certificate of Secondary Education (ICSE); Percentage: 96% Year of Completion: 2021
